## SUMMARY

I am actively pursuing opportunities in back-end development, database administration, and front-end development. With a robust foundation in computer science, extensive experience in database management, and proficiency in both back-end and front-end technologies, I am well-positioned to handle complex technical challenges. My expertise in data analysis and problem-solving further strengthens my ability to deliver innovative, efficient solutions. I am committed to applying my technical skills, meticulous attention to detail, and adaptability to contribute effectively to a dynamic and forward-thinking team.
