CAREER FOCUS

I am pursuing opportunities in back-end development, database administration, and front-end development. With a strong foundation in computer science, extensive database management experience, and proficiency in back-end and front-end technologies, I am well-equipped to tackle complex tasks. My expertise in data analysis and problem-solving enhances my ability to deliver innovative solutions. I am committed to leveraging my technical skills, attention to detail, and adaptability to contribute meaningfully to a collaborative, forward-thinking team.
